

School District Development Fees

Dear Applicant:

The State Legislature adopted a law which became effective January, 1987. This law requires that a fee be paid to the local school districts prior to the issuance of certain building permits.

The fee, based on the square footage, will be charged for all enclosed residential construction (adding more than 500 sq. ft.), new residential construction, adding enclosed space on commercial and industrial construction and on new commercial and industrial developments.

This fee is to be paid to the appropriate School District Office listed below. The certificate of payment is then returned to the Building Department prior to the issuance of building permits.

For further information, please call the School District Office. (See Bldg Dept for a form prior to paying Dist.)
